**The Council's Mission:**

*The Water Quality Financial Assistance Council provides the Department of Ecology (Ecology) with advice and guidance for the effective and efficient administration of its state and federal grants and loans programs. The council is not mandated in state law but was formed by Ecology to help ensure that the process of administering state and federal grants and loans is transparent and is supported by Ecology's clients and stakeholders. The Council is comprised of representatives from cities, counties, tribes, conservation districts, special purpose districts, environmental groups, and state and federal agencies.*
